EDUCATION

PRESIDENT UNIVERSITY, Candidate for *Sarjana Komputer (S.Kom.)*.

GPA 3.61 / 4.00, Sep 2024 - Present

Honors: Jababeka Scholarship

Aug 2024 - Aug 2027

Activities: President University Studen Board (BEM), Diverventure

Oct 2025 - Jul 2026

WORK EXPERIENCE

PT. Omron Manufacturing Indonesia

Cikarang, Bekasi

Juni 2026 - Juli 2026

Fullstack Developer Internship, Web Developer

Assigned to PT Omron Manufacturing Indonesia and stationed at the IAB Division warehouse, the task involved digitizing a manual, paper-based system. New digital features were integrated into the existing system, making warehouse processes more efficient, accurate, and accessible.

DISKOMINFOSANTIK

Cikarang Pusat, Bekasi

Juni 2025 - Aug 2025

Software Developer Internship, Programmer

Developed a Digital Selection & Training Management System for Disnaker using React (Vite), Tailwind CSS, and Express.js. Engineered app routing, backend structures for job management, and admin dashboards with SVG data visualizations. Transformed static prototypes into a functional, scalable full-stack application for public services.

PUSB / BEM

Cikarang, Bekasi

Dec 2025 - Jul 2026

Head of Web Development, Programmer

As Head of Web Development, I lead the technical team in managing and optimizing the official BEM website. I oversee the entire development lifecycle, from system architecture and feature implementation to routine maintenance, ensuring a seamless digital platform for student information and engagement

PROJECTS

NLP Hybrid Chatbot Summarization RAG, AI Developer, Front End Developer

Jan 2026 - Feb 2026

Developed an intelligent chatbot system with integrating Retrieval-Augmented Generation (RAG) with automatic text summarization for efficient PDF document processing.

Emoticare Face Detection, Deep Learning Engineer

Oct 2025 - Oct 2025

Engineered a real-time Face Detection system using YOLOv11 to support someone's mood through their expression

Design Anything, Full Stack Developer

Dec 2025 - Dec 2025

Built a full-stack image editing platform integrating AI-based features for enhanced user creativity. Utilized a Microservices Architecture to ensure system stability

AI Roadmap Adaptive E-Learning, UI/UX, Backend Developer

Nov 2025 - Nov 2025

Designed an AI-driven educational platform providing personalized learning paths tailored to individual user needs.

Meet and Fight (Mobile Application), Front End Developer

Dec 2025 - Dec 2025

Developed a cross-platform mobile application using Flutter as a final project for Wireless Mobile Programming. Focused on building a responsive user interface and implementing modern mobile functionalities.

Warehouse Management System, Full Stack Developer

Jan 2025 - Mar 2025

Developed a web-based Warehouse Management System using ASP.NET Core MVC as a full-stack project for inventory and logistics operations. Focused on implementing role-based authentication, stock movement tracking with automatic balance updates, and interactive dashboard analytics with Excel and PDF export capabilities.

PERSONAL

Informatics student at President University with a concentration in Artificial Intelligence (GPA 3.63/4.00), with experience in building end-to-end AI, web, and mobile applications. Proficient in Python, JavaScript, Java, C++, PHP, and SQL, with technical expertise in Next.js, React, Tailwind CSS, Flutter, and Laravel. Technical project experience includes developing NLP systems as well as Computer Vision models. Also serves as Head of Web Dev BEM President University, managing organizational and technical projects through Project Management, Figma, Git/GitHub, and Microservices architecture.

**SKILLS &
CERTIFICATES**

Software Development, AI/ML, Telecommunication and Networking. Leadership
